Yes, that is the document that has it. They haven't responded yet, no.

Thank you. I was looking for the most recent purpose and need statement, which I think I found in this document:
[TOC No. 6 Revised July 2022] Revised Basis of Design Report with Appendices.pdf

No action needed from you unless there is a newer one. Also, I want to verify that they didn't respond to the November remaining issues letter.

-Melanie

Subject: GRWW alternatives

Hey Melanie -

After our call, I wanted to forward you a copy of this second CR letter, which outlined several potential feasible and prudent alternatives.

Remind me what documents in particular you were trying to find in MiEnviro? I can probably get to them easier, but I can't recall exactly what you were looking for.

Also, so far it is looking like tomorrow morning, at the time of our planned touch base meeting, is the best time for others. I will give a little more time this morning for anyone who still wants to respond, then I will confirm the time this afternoon.

Thanks!
